

## Frequently Asked Questions

### Are there any hidden charges?

No. The \$295 charge is **all inclusive**. Our charge includes both the MRI scan and a specialty radiologist's interpretation and report.

### Can I come to you if I have health insurance?

Yes. We can scan everybody.

### Why don't you accept health insurance?

By choosing not to participate with any health insurance plans, we are able to offer our specialized service to everybody at the exact same rate without restrictions related to network participation, authorizations, insurance contract allowable rates, etc.

### What if I cannot tolerate the exam?

If you are unable to complete the exam and the MRI case is deemed un-diagnostic by the radiologist then you will not be charged for the study.

### Do you offer walk-in appointments?

Yes. We welcome walk-in patients. Our MRI center is open Monday – Friday from 9:00am to 4:00pm.

### Do I need a prescription to have an MRI at your center?

No. If you do not have a prescription then we will ask you to provide us the name and contact information for a physician of your choice so that we can share your results with them.

## Frequently Asked Questions

### Can you perform MRI scans on children?

During an MRI scan, the patient must remain still. We do not use any type of sedation during our exams. If you feel that your child can remain still for about an hour then we will scan them. Many children do very well at our center due to the unique and open design of our MRI system (our flat screen T.V. is a great distraction☺). You can even sit right next to your child during the MRI. Like all patients, if your child is unable to tolerate the exam and the radiologist determines that the exam is un-diagnostic, you will not be charged.

### Will I need to have an injection or shot of any type for the MRI scan?

No. You will not receive any injections or shots. Our exam is very peaceful and comfortable.

### Are there any dietary restrictions prior to the exam?

No. You can eat and drink right before the exam, in fact you could even eat and drink during the exam (as long as you remain still ☺).
